PROFESSIONAL SUMMARY

UI UX Designer and Developer passionate about creating digital platforms to better the community. Experience with prototyping designs using various industry software and development of websites and mobile applications using JavaScript and React. Seeking a full-time position in the industry, with the goal of improving user experience.

WORK EXPERIENCE

UI UX Engineer **Los Angeles, California**
Terran Orbital Corporation *February 2021 – Present*

- Contribute to the success of a multidisciplinary team who devise remote sensing satellite missions responsive to user needs
- Rapidly design, mockup, and assist in prototype development of customer-facing user interfaces for ordering and retrieval of PredaSAR products and services
- Assist in the design and development of efficient back-end interface elements to support UI/UX solutions
- Support proposal efforts by creating wireframes, graphical products, and support creative and written content.

HCI Engineer **San Francisco, California**
Teecon *March 2022 – Present*

- Designed a virtual “water cooler”, so that remote workers can have an online platform to facilitate conversation as they would in an in person work environment
- Performed a competitive analysis based on commercial practices and existing solutions
- Developed test procedures to validate UI/UX functionality workflow

UI UX Research and Designer **Athens, Georgia**
University of Georgia *December 2019 – July 2020*

- Researched designs of past Eco-feedback technology
- Proposed a new solution for a more sustainable environment
- Presented Paper at HCII (HCI International) conference
- Received ACM-W Conference grant
- Paper published by Springer

Information Technology Intern **Atlanta, Georgia**
Chick-fil-A Corporate *May 2019 – August 2019*

- Implemented a photography extension, which allowed restaurant operators to personalize their iOS wallboard and digital displays
- Created a solution to reduce calls during hours of less operation, depending on the location of the restaurant.
